Subject Index of Volume B4

Alkali ion sensor
  based on Prussian Blue-covered interdigitated array electrodes, 333
Ammonia
  measurement of, with Solidox–NH_3 system, 529
Amperometric substrate determination
  in flow-injection systems with polypyrrole–enzyme electrodes, 41

Biochemical sensors
  in industry, 207
Bioelectronic devices
  based on nyctinastic plants, progress report, 293
BioFETs
  for process control in biotechnology, 315
Biomedical applications
  monolithic compensated Si pressure transducer with temperature output for, 251
Bioprocess control
  combination of amperometric integrated glucose sensor with flow injection analysis for, 309
Biosensors
  chip, on thin-film metal electrodes, 287
  for choline, choline esters and inhibitors of choline esterase, 257
  enzymatic hybrid, 211
  fundamentals, applications and trends, 197
  glucose and ethanol, based on thick-film technology, 267
Biotechnological processes
  radiation sensors for analysis of, 303
Biotechnology
  BioFETs for process control in, 315
Bismuth ferrites
  new materials for semiconductor gas sensors, 545
Butyrylcholinesterase
  enzyme semiconductor sensor based on, 283

Cadmium
  highly sensitive and selective NO_x and NO_2 sensor based on Cd-doped SnO_2 thin films, 457
Calcium
  Ca-sensitive field-effect transistor with inorganic layer, 141
  flow injection analysis system with glass-bonded ISFETs for simultaneous detection of Ca and K ions and pH, 239
Calcium sensor
  ISFET-based Ca sensor using photopolymerized polysiloxane membrane, 235
Calixarenes
  as active agents for chemical sensors, 325
Calorimetric study
  interaction of electron-accepting vapours with phthalocyanine and related compounds, 505
Capacitors
  optimization of geometry of gas-sensitive interdigital, 95
Carbon monoxide
  influence of relative humidity on response of Sn oxide gas sensors to carbon monoxide, 185
  reduction of interference caused by NO and SO_2 in CO response of Pd-catalysed SnO_2 combustion gas sensors, 479
Carbon tetrachloride
  characteristic dual response of Sn dioxide gas sensors to gaseous, 445
Catalyst/electrochemical sensor systems
  detection of halogenated and other hydrocarbons in air; response functions of, 337
Cell activity
  computer simulations of responses of passive and active integrated microbiosensors to, 261
Ceramics
  scanning tunnelling microscopy on oxygen-sensitive Ga_2O_3 thin-film, 401
Cerium
  kinetics of oxygen interaction with Pt/CeO_2 sensors; application of new pressure modulation spectroscopy, 23
  oxygen gas sensors based on CeO_2 thick and thin films, 393
CHEMFET devices
  immunoenzymatic assay using, 245
Chemical grafting
  PECVD Si oxynitride; new insulator for ISFETs with insulator surface modified by, 385
Chemical reactors
  combination of electrochemical gas sensors with, 373
Chemical sensing
  molecular electronics and nanotechnology; interface technologies down to molecular scale, 7
Chemical sensor characterization
  use of complex impedance spectroscopy, 359
Chemical sensors
  calixarenes as active agents for, 325
  impedance spectroscopy on Si-based, with Langmuir–Blodgett films, 379
  membranes for, 53
  thick-film, 321
Chemosensors
  high electronic selectivity obtainable with nonselective, 35
Chip biosensors
  on thin-film metal electrodes, 287
Choline
  biosensors for, choline esters and inhibitors of choline esterase, 257
Computer simulations
  of responses of passive and active integrated microbiosensors to cell activity, 261
Condenser microphones
  PECVD Si nitride diaphragms for, 79

Elsevier Sequoia/Printed in The Netherlands

Conductance
in oxidative gases of metal-free and some metal phthalocyanines, effect of crystal form on, 495
Conductance response
of sintered SnO_2 samples to H_2S, equilibrium and non-equilibrium, 451
Conducting polymers
integrated arrays of gas sensors using, with molecular sieves, 29
Conductivity behaviour
of thick-film Sn dioxide gas sensors, 473
Crystal form
effect of, on conductance in oxidative gases of metal-free and some metal phthalocyanines, 495

Electrochemical instrument
thick-film, 175
Electrode materials
mixed valent W oxides; new, for potentiometric detection of dissolved oxygen at temperatures below 35 °C, 345
Electrolyte cells
determination of oxygen activities in melts and solid materials by solid, 417
Electron-accepting vapours
interaction of, with phthalocyanine and related compounds; novel calorimetric study, 505
Electronic selectivity
high, obtainable with nonselective chemosensors, 35
Environmental measurements
new microsensor for, 539
Enzymatic hybrid biosensors, 211
Enzyme semiconductor sensor
based on butyrylcholinesterase, 283
Ethanol
biosensors, glucose and, based on thick-film technology, 267
Europe
science and technology in; EC subsidiary research, 1

FETs
Ca-sensitive field-effect transistor with inorganic layer, 141
optimization of sputtered SnO_2 films as gas-sensitive layers for suspended-gate FETs, 157
pH sensor based on differential measurements on one pH-FET chip, 145
Flow injection analysis
combination of amperometric integrated glucose sensor with, for bioprocess control, 309
Flow injection analysis system
with glass-bonded ISFETs for simultaneous detection of Ca and K ions and pH, 239
Flow-injection systems
amperometric substrate determination in, with polypyrrole–enzyme electrode, 41

Gallium arsenide
hydrogen sensor based on Pt/GaAs Schottky diode, 515
Gallium oxide
scanning tunnelling microscopy on oxygen-sensitive Ga_2O_3 thin-film ceramics, 401
thin films; new material for high-temperature oxygen sensors, 437
Gas detection cells
selectivity enhancement of amperometric; linear potential sweep voltammetry (LPSV) after specific adsorption at fixed potentials, 519
Gas-sensitive interdigital capacitors
optimization of geometry of, 95
Gas-sensitive layers
optimization of sputtered SnO_2 films as, for suspended-gate FETs, 157
Gas-sensitive organic semiconductor compounds
comparison of thick- and thin-film, 169
Gas sensitivity measurements
on NO_2 sensors based on Pb phthalocyanine thin films, 511
Gas sensors
Bi ferrites; new materials for semiconductor, 545
combination of electrochemical, with chemical reactors, 373
conductivity behaviour of Sn dioxide, 473
dual response of Sn dioxide gas sensors characteristic of gaseous carbon tetrachloride, 445
fundamentals and principles of potentiometric, based upon solid electrolytes, 365
influence of relative humidity on response of Sn oxide, to carbon monoxide, 185
integrated arrays of, using conducting polymers with molecular sieves, 29
reduction of interference caused by NO and SO_2 in CO response of Pd-catalysed SnO_2 combustion, 479
Schottky-barrier and conductivity, based upon Pd/SnO_2 and Pt/TiO_2, 87
selectivity studies and oxygen dependence of Sn(IV) oxide-based, 485
single-crystal metal oxide, 467
Sn oxide; analytical comparison of gas-sensitive and non-gas-sensitive thin films, 463
Glucose biosensor
and ethanol biosensors based on thick-film technology, 267
Glucose sensor
combination of amperometric integrated, with flow injection analysis for bioprocess control, 309
electrochemical, on permselective non-conducting substituted pyrrole polymers, 273

Humidity
influence of relative, on response of Sn oxide gas sensors to carbon monoxide, 185
Humidity sensor
diode-type, using perovskite-type oxides operable at room temperature, 227
realization of, 189
Hydrocarbons
detection of halogenated and other, in air; response functions of catalyst/electrochemical sensor systems, 337
Hydrogen
simultaneous response of work function and resistivity of some SnO_2-based samples to H_2 and H_2S, 163

Hydrogen sensor
based on Pt/GaAs Schottky diode, 515
Hydrogen sulfide
equilibrium and non-equilibrium conductance response of sintered SnO_2 samples to H_2S, 451
simultaneous response of work function and resistivity of some SnO_2-based samples to H_2 and H_2S, 163

Immunoenzymatic assay
using CHEMFET devices, 245
Immunosensor
development of optical waveguide interferometric, 297
Impedance spectroscopy
in chemical sensor characterization, use of complex, 359
on Si-based chemical sensors with Langmuir–Blodgett films, 379
Insulator
PECVD Si oxynitride; new insulator for ISFETs with insulator surface modified by chemical grafting, 385
Interdigitated array electrodes
alkali ion sensor based on Prussian Blue-covered, 333
Interface technologies
down to molecular scale; chemical sensing, molecular electronics and nanotechnology, 7
Ion sensors
novel Langmuir–Blodgett membranes for Si-based, 65
Iridium oxide
preparation of, and its application in sensor–actuator systems, 151
ISFETs
-based Ca sensor using photopolymerized polysiloxane membrane, 235
flow injection analysis system with glass-bonded, for simultaneous detection of Ca and K ions and pH, 239
future applications of, 125
PECVD Si oxynitride; new insulator for, with insulator surface modified by chemical grafting, 385
reduced light sensibility in optimized Ta_2O_3-ISFET structures, 135

Kinetic behaviour
of resistive oxygen sensors, 425
Kinetics
of oxygen interaction with Pt/CeO_2 sensors; application of new pressure modulation spectroscopy, 23
Langmuir–Blodgett films
impedance spectroscopy on Si-based chemical sensors with, 379
Langmuir–Blodgett membranes
for Si-based ion sensors, novel, 65
Lead phthalocyanine thin films
gas sensitivity measurements on NO_2 sensors based on, 511
for NO_2 sensors, 73
Light sensibility
reduced, in optimized Ta_2O_3-ISFET structures, 135
Limiting-current type sensors
adaptive signal conditioning for, 407
Linear potential sweep voltammetry (LPSV)
selectivity enhancement of amperometric gas detection cells; LPSV after specific adsorption at fixed potentials, 519

Membranes
for chemical sensors, 53
for Si-based ion sensors, novel Langmuir–Blodgett, 65
Metal electrodes
chip biosensors on thin-film, 287
Metal oxide
gas sensors, single-crystal, 467
Microbiosensors
computer simulations of responses of passive and active integrated, to cell activity, 261
Microprobe
two-wire, digital output multichannel, for recording single-unit neural activity, 217
Microsensor
for environmental measurements, new, 539
Molecular electronics
chemical sensing, and nanotechnology; interface technologies down to molecular scale, 7

Nanotechnology
chemical sensing, molecular electronics and; interface technologies down to molecular scale, 7
Neural activity
two-wire, digital output multichannel microprobe for recording single-unit, 217
Nitric oxide
reduction of interference caused by NO and SO_2 in CO response of Pd-catalysed SnO_2 combustion gas sensors, 479
Nitrogen dioxide
microprocessor-controlled, sensing system, 499
new high-frequency, high-sensitivity SAW device for NO_2 gas detection in sub-ppm range, 103
Nitrogen dioxide sensors
gas sensitivity measurements on, based on Pb phthalocyanine thin films, 511
lead phthalocyanine thin films for, 73
Nitrogen oxides
highly sensitive and selective NO_x and NO_2 sensor based on Cd-doped SnO_2 thin films, 457
Nyctinastic plants
bioelectronic devices based on, progress report, 293

Odours
detection of vapours and, from multisensor array using pattern recognition; principal component and cluster analysis, 109
integrated Sn oxide odour sensors, 117
Optical waveguide
interferometric immunosensor, development of, 297
Oxidative gases
effect of crystal form on conductance in, of metal-free and some metal phthalocyanines, 495

Oxygen
mixed valent W oxides; new electrode materials for potentiometric detection of dissolved, at temperatures below 35 °C, 345
scanning tunnelling microscopy on oxygen-sensitive Ga_2O_3 thin-film ceramics, 401
Oxygen activities
in melts and solid materials by solid electrolyte cells, determination of, 417
Oxygen dependence
selectivity studies and, of Sn(IV) oxide-based gas sensors, 485
Oxygen gas sensors
based on CeO_2 thick and thin films, 393
Oxygen interaction
with Pt/CeO_2 sensors, kinetics of; application of new pressure modulation spectroscopy, 23
Oxygen sensors
based on sputtered Sr titanate, 99
Ga oxide thin films; new material for high-temperature, 437
kinetic behaviour of resistive, 425
mixed oxides for low-temperature; phase characterization, spectroscopic and electrical investigations of titania-doped yttria-stabilized zirconia, 411
response times of resistive thick-film, 431

Palladium
reduction of interference caused by NO and SO_2 in CO response of Pd-catalysed SnO_2 combustion gas sensors, 479
Schottky-barrier and conductivity gas sensors based upon Pd/SnO_2 and Pt/TiO_2, 87
Pattern recognition
detection of vapours and odours from multisensor array using; principal component and cluster analysis, 109
PECVD
Si nitride diaphragms for condenser microphones, 79
Pellistor sensor
Si planar pellistor; low-power, in Si thin-film technology, 533
Perovskite-type oxides
diode-type humidity sensor using, operable at room temperature, 227
pH
flow injection analysis system with glass-bonded ISFETs for simultaneous detection of Ca and K ions and, 239
Phase characterization
mixed oxides for low-temperature oxygen sensors; spectroscopic and electrical investigations of titania-doped yttria-stabilized zirconia, 411
Phenylarsine
fast detection of; comparison of sputtered and sintered SnO_2 films, 355
pH sensor
based on differential measurements on one pH-FET chip, 145
Phthalocyanine(s)
effect of crystal form on conductance in oxidative gases of metal-free and some metal, 495
interaction of electron-accepting vapours with, and related compounds; novel calorimetric study, 505
Plasma-enhanced chemical vapour deposition
Si oxynitride; new insulator for ISFETs with insulator surface modified by chemical grafting, 385
Platinum
hydrogen sensor based on Pt/GaAs Schottky diode, 515
kinetics of oxygen interaction with Pt/CeO_2 sensors; application of new pressure modulation spectroscopy, 23
Schottky-barrier and conductivity gas sensors based upon Pd/SnO_2 and Pt/TiO_2, 87
Pollutant gases
application of ZrO_2 sensor in determination of, 525
Polypyrrole–enzyme electrodes
amperometric substrate determination in flow-injection systems with, 41
Polysiloxane membrane
ISFET-based Ca sensor using photopolymerized, 235
Potassium
flow injection analysis system with glass-bonded ISFETs for simultaneous detection of Ca and K ions and pH, 239
Pressure modulation spectroscopy
kinetics of oxygen interaction with Pt/CeO_2 sensors; application of new, 23
Pressure transducer
monolithic compensated Si pressure transducer with temperature output for biomedical applications, 251
Process control
in biotechnology, BioFETs for, 315
Prussian Blue
alkali ion sensor based on, -covered interdigitated array electrodes, 333
Pyrrole polymers
electrochemical glucose sensors on permselective non-conducting substituted, 273

Radiation sensors
for analysis of biotechnological processes, 303
Response times
of resistive thick-film oxygen sensors, 431

SAW device
new high-frequency, high-sensitivity, for NO_2 gas detection in sub-ppm range, 103
Scanning tunnelling microscopy
on oxygen-sensitive Ga_2O_3 thin-film ceramics, 401
Schottky diode
hydrogen sensor based on Pt/GaAs, 515
Science and technology
in Europe; EC subsidiary research, 1
Selectivity enhancement
of amperometric gas detection cells; linear potential sweep voltammetry (LPSV) after specific adsorption at fixed potentials, 519
Selectivity studies
and oxygen dependence of Sn(IV) oxide-based gas sensors, 485
Sensing system
microprocessor-controlled nitrogen dioxide, 499
Signal conditioning
for limiting-current type sensors, adaptive, 407

Silicon
impedance spectroscopy on Si-based chemical sensors with Langmuir–Blodgett films, 379
monolithic compensated Si pressure transducer with temperature output for biomedical applications, 251
novel Langmuir–Blodgett membranes for Si-based ion sensors, 65
PECVD Si nitride diaphragms for condenser microphones, 79
planar pellistor; low-power pellistor sensor in Si thin-film technology, 533
Silicon oxynitride
PECVD; new insulator for ISFETs with insulator surface modified by chemical grafting, 385
Solidox–NH_3 system
measurement of ammonia with, 529
Strontium titanate
fast oxygen sensors based on sputtered, 99
Sulfur dioxide
reduction of interference caused by NO and SO_2 in CO response of Pd-catalysed SnO_2 combustion gas sensors, 479

Tantalum
reduced light sensibility in optimized Ta_2O_5-ISFET structures, 135
Tin dioxide
conductivity behaviour of Sn dioxide gas sensors, 473
dual response of Sn dioxide gas sensors characteristic of gaseous carbon tetrachloride, 445
equilibrium and non-equilibrium conductance response of sintered SnO_2 samples to H_2S, 451
fast detection of phenylarsine; comparison of sputtered and sintered SnO_2 films, 355
highly sensitive and selective NO_x and NO_2 sensor based on Cd-doped SnO_2 thin films, 457
optimization of sputtered SnO_2 films as gas-sensitive layers for suspended-gate FETs, 157
reduction of interference caused by NO and SO_2 in CO response of Pd-catalysed SnO_2 combustion gas sensors, 479
Schottky-barrier and conductivity gas sensors based upon Pd/SnO_2 and Pt/TiO_2, 87
simultaneous response of work function and resistivity of some SnO_2-based samples to H_2 and H_2S, 163
Tin oxide
gas sensors; analytical comparison of gas-sensitive and non-gas-sensitive thin films, 463
influence of relative humidity on response of Sn oxide gas sensors to carbon monoxide, 185
integrated Sn oxide odour sensors, 117
selectivity studies and oxygen dependence of Sn(IV) oxide-based gas sensors, 485
Titanium
mixed oxides for low-temperature oxygen sensors; phase characterization, spectroscopic and electrical investigations of titania-doped yttria-stabilized zirconia, 411
Schottky-barrier and conductivity gas sensors based upon Pd/SnO_2 and Pt/TiO_2, 87
Tungsten oxides
mixed valent; new electrode materials for potentiometric detection of dissolved oxygen at temperatures below 35 °C, 345

Vapours and odours
detection of, from multisensor array using pattern recognition; principal component and cluster analysis, 109

Yttrium
mixed oxides for low-temperature oxygen sensors; phase characterization, spectroscopic and electrical investigations of titania-doped yttria-stabilized zirconia, 411

Zirconium
application of ZrO_2 sensor in determination of pollutant gases, 525
mixed oxides for low-temperature oxygen sensors; phase characterization, spectroscopic and electrical investigations of titania-doped yttria-stabilized zirconia, 411
